¹Adaptive Cruise Control is no substitute for the driver's personal responsibility to operate the vehicle in a safe manner. The driver needs to remain attentive to traffic and road conditions and provide the steering, braking or other inputs necessary to retain control of the vehicle. The Front Automatic Braking feature may help reduce crash damage under certain conditions discussed in the Owner's Manual. Never rely on this feature to brake the vehicle. ²The Forward Automatic Braking feature may help reduce crash damage under certain conditions discussed in the Owner's Manual. Never rely on this feature to brake the vehicle. ³The vehicle must be on or Retained Accessory Power must be active. Remove all objects from the charging pad. Place the compatible mobile device face up on the charging symbol on the charging pad. Move the device slowly until the battery charging symbol displays on the touch-screen, indicating the device is charging. See your Infotainment System Owner's Manual. ⁴Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices. Data plan rates apply. ⁵Not compatible with all devices. ⁶Requires GMC Infotainment System and compatible iPhone[®] running iOS 6 or newer. ⁷Please check with your local GMC dealer for available Map coverage in your country. ⁸Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger airbag. See the Owner's Manual and child safety seat instructions for more safety information. ⁹Before making a lane change, always check the exterior and interior rear-view mirrors, look over your shoulder for vehicles and hazards and start the turn signal.
