INTRODUCING SUBARU'S FIRST FULLY ELECTRIC SUV: ALL-NEW SUBARU SOLTERRA

Take excitement to the next level with the most technologically advanced Subaru ever made. Built on our first ever all-electric architecture—the Subaru e-Global Platform—Solterra is named by combining the Latin words for 'sun' and 'earth'.

With Subaru's core technology, dual motors and its trusted Permanent All-Wheel Drive System, Solterra offers outstanding driving performance—with the same 5-star safety, go-anywhere capability and ever-dependable, rugged reliability that all our SUVs are renowned for.

Be prepared to effortlessly tackle any terrain in any weather. Corner with precise control. Experience an always-smooth ride. And enjoy every minute.

KEY FEATURES

PERMANENT ALL-WHEEL DRIVE (AWD)

Subaru Solterra takes this renowned all-weather, all-terrain technology to exciting new places. Permanent AWD comes as standard and gives you maximum confidence and control at all times by continuously shifting power to the wheels that have the most traction, ensuring excellent road-holding—whatever the weather or terrain. Couple that with the smooth linear output of the dual electric motors in Solterra and you have outstanding capability in all conditions—with instant torque.

RANGE AND CHARGING

With a fully charged battery, all-new Solterra can achieve a range of up to 288 miles[†]. So whether you're going off the beaten track, camping with the kids or just using it for everyday journeys, there'll be plenty of charge to get you to where you want to be. Recharging is simple and convenient, with a variety of options, both at home and on the go. Benefit from zero emissions and all of the legendary capability of a Subaru—fuelled by battery power alone.

e-SUBARU GLOBAL PLATFORM

Constructed on the all-new e-SUBARU Global Platform, Solterra offers a unique driving experience in a battery electric vehicle (EV). With a low centre of gravity due to the flat battery unit being placed directly beneath the vehicle, the design features of this platform work together to provide even more enjoyment and peace of mind for drivers and passengers alike. A newly developed high-capacity battery and innovative heat management system, with heat pump fitted as standard (to maximise driving range), have also been adopted to allow the vehicle to be used daily with a competitive cruising range. To improve longevity, the battery structure and charge control have been developed with the aim of achieving a 90%[^] range retention rate after 10 years.

DUAL FUNCTION X-MODE WITH HILL DESCENT CONTROL

Solterra features an upgraded version of the X-MODE AWD system that provides added confidence on rough roads. You don't need to be an off-road expert—simply press a button to easily navigate deep mud, snow or even steep, slippery slopes—all in a controlled, calm, worry-free way. With a low centre of gravity, Solterra has a minimum ground clearance of 210mm—so you can go places traditional electric vehicles typically can't.

SPACIOUS INTERIOR

Solterra has the capacity and room for any adventure. Due to the long wheelbase and flat floor, there's ample passenger space and generous leg room in the rear. The innovative cockpit layout offers greater visibility and the panoramic sunroof provides a light and open cabin, making Solterra feel much larger than it is. This is a vehicle that's both modern and full of convenient, comfortable features. And with up to 452 litres of cargo space, you can easily bring along all the gear you need for your adventures.

SUBARU SAFETY SENSE

At Subaru, safety always comes first, and this concept is carried over to Subaru's first-ever battery EV. Solterra comes with a new safety package, Subaru Safety Sense*, which covers all-around safety in an even greater range of situations. This innovative pack of advanced driver assistance and collision avoidance technology, fitted as standard, includes Safe Exit Assist, Reverse Automatic Braking, 360-degree panoramic monitors and Pre-Collision Braking to create a safer driving environment for you and other road users.

CONNECTIVITY

All-new Solterra features the most advanced infotainment system yet, featuring wireless connectivity for Apple CarPlay® and wired Android Auto™ integration, so you can stay connected and in touch when out on the road. Touch, swipe or drag to easily navigate the large, intuitive 12.3" touchscreen, or simply use your voice. You can even charge your smartphone wirelessly in the centre console while you safely operate the hands-free connection and enjoy your favourite apps and content. Touring model comes with Harman Kardon® speakers.

(BETTER where it MATTERS)

We build powerful, all-wheel-driving, safety-standard-setting, easy-off-roading, any-weather-driving, forever-lasting cars. Every step of the way, we make sure that what we do is Better Where It Matters.

All-new fully electric Solterra is a continuation of Subaru's commitment to this philosophy. We've merged Subaru's core DNA with electric technology, so you have the best of both worlds. You can expect the same 5-star safety, go-anywhere capability and rugged reliability that all Subaru SUVs are renowned for—with zero emissions.

Please check model specification for availability/details. Model show may not reflect UK specification. *Subaru Safety Sense is a driving support system which may not operate optimally under all driving conditions or for all objects. The driver is always responsible for safe and attentive driving and observance of traffic regulations. †Range figures shown are combined WLTP (indicative) and can vary significantly depending on factors such as selected grade, accessories fitted, driving style, weather conditions, speed or vehicle load. These figures may not reflect your real-life driving results. ^The battery capacity retention ratio may decrease depending on the customer's usage environment (such as weather and traffic conditions) and driving method (for example, sudden acceleration or use of air conditioning).
