CORVETTE Z06 GRILLE KIT, FOR MODELS WITHOUT FRONT CAMERA

The Z06 front grille was designed to provide maximum air flow to the radiator, and brake cooling ducts. This resulted in a front end air flow increase of 17-percent (based on CFD analysis) when compared to the Z51. That additional air flow can help keep your Stingray running cooler on the track. Additionally, the inlet ramps to the brake cooling ducts were optimized to balance the air flow demands of brake cooling and engine cooling.
