PLUG-IN HYBRID ELECTRIC VEHICLE CHARGING

Universal Charging Cable

The universal cable provides an up-grade from the standard 'home charging' cable, helping to reduce the time required for charging. The 6 metre long, multi-function cable comes in two parts. The cable features an in cable control unit (ICCU) for power management and can be fitted either with a 16 amp adaptor for domestic use or a 32 amp adaptor which utilises a higher power supply (up to 7.5kW) and can be used with appropriate industrial sockets. The 16 amp domestic sockets are also interchangeable with market specific versions for use when charging abroad. When charging away from home, the cable can be stored in the vehicle's loadspace using a purpose designed storage case and retention system.

Public Charging Cable

The public charging cable provides an up-grade from the standard 'home charging' cable, helping to reduce the time required for charging. The 6 metre long, public cable can be used with a universal style A/C wall box (which does not feature a tethered cable), to provide a fast charging solution at home. Alternatively it is compatible with public charging points. When away from home, the cable can be stored in the vehicle's loadspace using a purpose designed storage case and retention system.
