A Toyota Group Company

700

THE NEW HINO 700

POWER. RELIABILITY. DURABILITY

As a business partner you can rely on, the heavy-duty hauling HINO 700 range comes ready with two dynamic application-specific engines.

- 2841: 302 kW @ 1500-1800 rpm / 1961 Nm @ 1000-1400 rpm
- 2845: 331 kW @ 1500-1800 rpm / 2157 Nm @ 1000-1400 rpm
- 16-speed ZF automated manual transmission
- Fully automatic shifting with optional manual override
- Limits driver exhaustion and saves fuel
- Optimised power units for lower fuel consumption and higher reliability
- ECO Run intervention limits sharp acceleration and uneconomical high-speed driving.

ALWAYS POWERING AHEAD

The front of HINO 700 series has been redesigned for aerodynamic and safety optimisation.

- Bold, aggressive appearance from new 3D grille
- Redesigned mirror housings to reduce drag and additional mirrors fitted for better all-round vision
- Easier to grab door handles.

EASE OF DRIVING. PEACE OF MIND

Upgraded interior comfort in the new HINO 700 means more energised drivers and safer mileages covered, thereby reducing the risk of accidents.

- Better all-round visibility, reduced cabin noise, improved controls layout
- Ergonomic shift selector and assist grip
- Easier-to-reach parking lever
- Enhanced instrument cluster with multi-information trip and fuel consumption display
- 10-way adjustable driver seat with added lumbar support
- Larger centre console and tray area, water bottle-sized door pockets
- Quarter trim panel pockets added
- LED cabin lighting

LOCKS IN LOADS

When minimising downtime is the name of the game, keeping your HINO on the road is the best value-adding proposition. The new 700 Series integrates next-gen active safety interventions, such as:

- A pre-collision system. Detects objects ahead and issues a warning before automatically applying the brakes
- Lane departure warning. The driver is alerted on the display when deviating from the current driving lane
- Stagger warning. When staggering is detected, an alert is sounded to ensure timeous corrective action
- Driver monitor warning. Monitors the driver's body and face for insufficient attention. When deemed dangerous, the driver is prompted
- Adaptive cruise control. Maintains a consistently safe distance to the vehicle in front
- Directional warning. Sounds originating from the appropriate direction are played to draw the driver's attention for a more rapid and corrective response
- Multifunctional steering wheel. Keeps hands on the wheel and eyes on the road for maximum safety.

HINO VALUE ADDED SERVICES

HOW HINO GOES THE DISTANCE FOR ITS CUSTOMERS
