

OUTLANDER PHEV

MITSUBISHI
MOTORS
Drive your Ambition

"I can truthfully say this is the best car I have ever driven or owned. It is spacious, comfortable, economical, classy and so quiet I keep forgetting to switch it off when I get out! ... It is ridiculously cheap to run achieving the equivalent of over 100 mpg most of the time, ... A truly perfect all rounder."

JBS100, owner

"Key to the success of the Mitsubishi Outlander PHEV is that it doesn't ask its owners to make any compromises. For people wanting an SUV, it offers the same space and practicality, as well as the all-important elevated driving position, as any of its competitors." The Electric Car Report

THE SUV WITH AN ACE UP ITS SLEEVE

This Mitsubishi Outlander is a great all-rounder. It's just the right size, offering all the practical flexibility of an SUV without being too big about town. It's exceedingly quiet and exceptionally comfortable, enveloping you in a supportive hug no matter how long the journey. It's lavish: indeed, even in the entry level model the list of standard equipment is impressive. And it's extremely safe, providing a comprehensive package of active safety features to match just about any car at any price.

But the Mitsubishi Outlander PHEV also has a not-so-secret card up its sleeve: it's the most successful plug-in hybrid electric vehicle in the world, with more than 100,000 on the roads in Europe alone. It uses tomorrow's technology today, helping to conserve our world's finite resources. And it can save you money too - not just a little money, but a lot! What's more, the world's favourite plug-in hybrid SUV is now even cleaner, more efficient, smoother and more powerful than ever before, making it a sure-fire winner in the future too.

"The 2019 Outlander PHEV doesn't reinvent the wheel, but then again it didn't need to... in a couple of important aspects improvements have been made... the new car is quieter, rides better and feels more solid than ever." car

JUDGED TO BE THE BEST LARGE SUV

For decades those in the know have known Mitsubishi to be the clever car company, and this is probably the cleverest car of them all. The Outlander PHEV (Plug-in Hybrid Electric Vehicle) is a full up, family-sized SUV: a proper SUV, with proper 4-wheel drive, which requires absolutely no compromise in terms of practicality or go-anywhere, all-weather drivability. Yet it utilises a combination of electricity and petrol to return nothing short of exceptional fuel consumption, as well as CO₂ emissions of just 40g/km*. Together this ensures simply startling financial benefits.

*There is a new test used for fuel consumption and CO₂ figures. The CO₂ figure shown however is based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.

Mitsubishi Motors Corporation had long recognised the role that electricity could play in powering cars and spent over 40 years developing the technology. The Outlander PHEV combines this knowledge and experience with the four-wheel drive practicality of the legendary Shogun and the cutting-edge performance technology developed for the Mitsubishi Lancer Evolution. It was the world's first 4WD Plug-in Hybrid SUV, and is the car by which others are judged. Since the Outlander PHEV was voted Best Large SUV by What Car? in their reliability survey last year, clearly they have been found wanting.

DRIVE MODES

EV DRIVE MODE – ELECTRIC POWER ONLY

SERIES HYBRID MODE: ELECTRIC POWER + ENGINE ASSISTANCE

PARALLEL HYBRID MODE: ENGINE POWER + MOTOR ASSISTANCE

NEW 2.4-LITRE ENGINE

FRONT POWER DRIVE UNIT

GENERATOR

FRONT MOTOR

CHARGE OR SAVE

In Battery Charge mode, when the engine is engaged it continually charges the battery. In Battery Save mode the engine will maintain the charge you have when it is engaged, allowing you the optimum charge for town driving later in your journey, for example.

EV PRIORITY SWITCH

Allows you to manually select all-electric driving, so the petrol engine will only start automatically if the battery's charge drops to an excessively low level or very high power output demands are made.

REGENERATIVE BRAKING

Kinetic energy which is generated whilst decelerating is also used to recharge the drive battery. As soon as the accelerator pedal is released the motors function as power generators; this feels similar to engine braking in a petrol or diesel-powered car. Six levels of regenerative braking can be selected via paddles mounted within fingertip reach of the steering wheel.

REAR ELECTRIC MOTOR CONTROL UNIT

REAR MOTOR

DRIVE BATTERY

HYBRID SUCCESS IN THE REAL WORLD

To understand the Outlander PHEV's supremacy, first you need to understand how it works. It uses series parallel hybrid technology, which is not new – such vehicles have been available for some years. What is new is that it is really an electric vehicle at heart. Unlike other hybrids, most of the time motion comes from its twin electric motors, and it is this bias which makes the vehicle so utterly awesome in the real world. In EV mode the PHEV can travel up to 28 miles: ample distance for the average daily commute. EV mode means no petrol, no emissions, and no trade off in terms of power – torque is instant and the top speed 83mph – actually exceeding the UK legal limit!

When more power is needed, or when the battery's charge falls, the Series Hybrid mode kicks in, with the petrol engine acting as a generator. For longer periods of high speed motoring the Parallel Hybrid mode takes over. You won't know when any of this happens – the transition is seamless – and you don't have to make any decisions either since, if you wish, the PHEV will automatically select the optimum mode. But clever though it is, it doesn't know what lies ahead – like miles of cross city driving at the end of your journey, for example – so you do have the options to save or extend your battery usage at the mere flick of a switch.

SPARKING SUPERB SAVINGS

Unlike most other vehicles, from the outset this generation of the Mitsubishi Outlander was designed to be available with drivetrains for both an internal combustion engine and as a plug-in hybrid electric vehicle. This means that there is almost no compromise in terms of either weight distribution or space (the vast majority of PHEVs locate the battery in the boot, adversely affecting both). It can transport five people in comfort, or swallow a couple of mountain bikes whole, and take you to all the exciting places in which to use them, courtesy of its all-electric four-wheel drive system backed up by fully electric traction and stability control. And, because it's been designed to run in electric mode as soon and as often as possible, the financial benefits are both indisputable and exceptional.

- THE OUTLANDER PHEV IS EXEMPT FROM VEHICLE EXCISE DUTY IN THE FIRST YEAR

- IT IS EXEMPT FROM LONDON CONGESTION CHARGE

- IT PROVIDES ULTRA LOW TAX BENEFITS FOR COMPANY CAR DRIVERS:

Benefit-In-Kind tax is significantly less than that on an equivalent petrol-only vehicle, with an even greater advantage when compared to diesel, amounting to a tax saving of many thousands of pounds over three years. That low BIK rate also applies to fuel benefit, greatly amplifying the tax savings still further. It's actually like having a multi-thousand pound a year pay rise!

- IT PROVIDES TAX BENEFITS FOR COMPANIES TOO:

For companies who provide employees with vehicles, the PHEV is an equally tempting proposition, with a 100% write down allowance in the first year of ownership and massively reduced National Insurance contributions due to the ultra-low BIK rate.

For more information on how the Outlander PHEV can save you money – and how much – visit www.mitsubishi-cars.co.uk/new-cars/outlander/BIK

"The icing on the cake for me is the very welcome £400 per month company car/fuel benefit tax saving against my previous BMW 520d. Order one soon – they are going to be in very short supply."

KS, owner

ECONOMY IN THE REAL WORLD

In order to provide you with a true comparison between vehicles, all fuel economy figures must be assessed under independent laboratory conditions. The Outlander PHEV returns both incredible economy and tax-busting CO₂ emissions, but it is important to remember that, in any hybrid electric vehicle, the type and length of each journey is vital in effecting your results in the real world.

If your regular journeys are a mix of town and/or country roads interspersed with stretches of faster carriageway, and they are less than around 30 miles between charging opportunities, you could easily achieve better than the official figures; indeed, in practice some drivers have achieved many hundreds of miles on just one gallon of fuel. But on longer, high speed journeys the PHEV will mainly use the petrol engine, so the petrol consumption will be much higher.

139 MPG

AND CO₂ EMISSIONS AT 40G/KM*

* There is a new test used for fuel consumption and CO₂ figures. The CO₂ figure shown however is based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.

"Truly the easiest and smoothest vehicle I have ever driven. For me the plug in hybrid aspect is perfect as I can commute to work and back on almost pure electric costing me next to nothing!"

Jessica1986, owner

PLAYING BY DIFFERENT RULES

With good visibility and light controls the Outlander PHEV is easy to live with and easy to drive, despite its sophistication. Indeed, driving is as simple as driving an ordinary automatic. But there's really nothing ordinary about this PHEV at all. From the outset you will notice that it is exceptionally quiet – so quiet that we've built in a warning for pedestrians. You'll also notice strong instant torque and a smooth delivery of power. Of course, these are the traditional attributes of an electric motor, but Mitsubishi hasn't been content to rest on its success. Instead, the 19MY PHEV has seen sweeping changes under the skin. These include an updated rear motor, generator and increased battery capacity, so that linear shove that makes moving off and overtaking so effortless is now even more powerful.

When the petrol engine does cut in, seamlessly as ever, that too is brand new. In fact, the new 2.4 litre Atkinson cycle unit is the perfect partner in a hybrid. It's a quieter and more efficient system when bolstered at low revs by the electric motors, and it's a more powerful unit too. But, by combining it with Mitsubishi's MIVEC variable valve timing system, it effectively runs at just 1.7 litre capacity until full power is called for. The result is the best of all worlds – a driving experience that is both livelier and far more refined, without ever losing sight of the importance of economy and emissions.

Of course, the PHEV's power units are only half of the story. A particularly low centre of gravity (thanks to the positioning of the battery), permanent four-wheel drive with twin motors providing power to each axle, and an enhanced version of the famous Mitsubishi rally-honed Super All Wheel Control system are complemented, in the 19MY model, by a more rigid chassis, more precise steering and enhanced suspension, effectively absorbing cracks and ridges in the road. And because this is an SUV, albeit one with a difference, you have a choice of driving modes: sport, eco, standard, snow and locked four-wheel drive. This Outlander PHEV is an eco warrior that fits the bill in every sense.

At launch the PHEV was hailed as a game changer: Mitsubishi had laid down a new set of rules, and still they are being refined. In the words of one customer: "It's a great car. I am on my second one and it has improved greatly compared to the first generation." We do hope, Mr MS, that you try generation number three.

S-AWC

Super All Wheel Control is an integrated system which delivers incredible traction, solid stability and intuitive linear handling. It does this by combining Active Yaw Control with the twin motor 4WD, Anti-lock Braking System and Active Stability Control (which maintains control by automatically adjusting the engine output and braking forces at each wheel).

4WD MODES

This switch controls both the SNOW mode, for more secure motoring on snow-covered roads, and 4WD LOCK, distributing equal torque to all four wheels for improved traction on loose and slippery surfaces. SPORT mode can be engaged to improve performance in any drive setting, sharpening response from the electric motors.

"A more efficient petrol engine, enhanced electric powertrain and improved refinement make the world's best-selling plug-in car stronger than ever."

Autocar

SO DIFFERENT, YET SO REASSURINGLY FAMILIAR

The PHEV is more than a one-trick pony. Clever technology aside, the cabin is properly indicative of this vehicle's breeding, with cushioned surfaces, a solid build and cool styling which reinforces the overall ambience of quality. There is enormous attention to detail and a host of luxuries which make travelling a genuine pleasure, like heated seats and steering wheel, dual zone climate control air conditioning and a state-of-the-art, multi-function communication system which allows you to control your smartphone's applications and services through the touchscreen*. Of course, the displays are a little more exotic than in an ordinary car and, whilst the steering wheel mounted controls conventionally adjust audio and Bluetooth®, the paddles adjust the strength of regenerative braking instead of the gears.

*Specifications vary by model - please refer to pages 33-35 for full details.

HEATED STEERING WHEEL

"Big, comfy, smooth, quiet, plenty of toys. What's not to like?... (I) love this car." Cabbage, owner

UNIQUE PHEV DISPLAY FUNCTIONS

The Mitsubishi Smartphone Link Display Audio system, as well as the Multi-Information Display, show functions unique to the PHEV: energy flow, driving range, energy usage, etc, encouraging you to drive as economically as possible.

ELECTRONIC PARKING BRAKE & BRAKE AUTO HOLD

A pull up to apply/push down to release switch replaces the traditional handbrake lever, giving a tidier appearance to the centre console. The Brake Auto Hold function makes stop/start driving in heavy traffic easier, by avoiding the need to keep your foot on the brake pedal while stationary.

UK models display miles per gallon (mpg) and range in miles.

FIRST CLASS AMBIENCE

Size matters, and the PHEV's space is truly impressive. Its compact and powerful lithium-ion batteries are tucked well away under the seats resulting in an interior almost as spacious as that in the standard Outlander. The front row of seats are perfectly set at hip height for easy access, with 8-way powered adjustments for the driver*. The second row recline for greater comfort, split 60:40, and fold-and-tumble to provide an enormous boot; and, as you'd expect in an SUV, their position provides a panoramic view which everyone gets to enjoy.

Of course, ambience in a moving vehicle is about more than just space and seats. It's about good interior illumination, the use of leather (C-Tec simulated leather/suede on Juro) and, above all, the luxury of a little hush. In fact, the PHEV will glide along in near silence, soothing away the stresses of modern-day driving. Early on we recognised that little or no engine noise can lead to increased awareness of wind and road noise and worked hard to insulate the vehicle even more than usual. So the suspension itself features special rubber bushes and newly designed cross-members that reduce mechanical and road noise, there is extra soundproofing in the engine compartment, wheel housing and underfloor areas, even the windscreen is thicker than before, and we've introduced dozens more sound-deadening and vibration reduction measures. The overall effect is a remarkably quiet and refined drive: cosseted, effortless, relaxed, and virtually silent for much of the time.

*4h/hs

HEATED WINDSCREEN

Heated wires throughout the windscreen clear the glass of fog or frost to secure forward visibility in less time than by using the heater/defroster.

POWER TAILGATE (4h/hs)

The tailgate can be opened and closed automatically using a switch located near the driver's seat. It can also be activated remotely using the key or the button on the tailgate itself.

ELECTRIC HEATER

Since the engine doesn't operate during EV driving it generates no heat, instead an electric heater uses the water pump to circulate hot water and warm the cabin. Furthermore, you can pre-set both the heater and the air conditioning to activate prior to your journey for optimum comfort.

"Improved insulation against noise and vibration makes the new Outlander PHEV a relaxing place to sit and it remains quiet at motorway speeds."

Wired

ADAPTIVE CRUISE CONTROL (ACC) (4hs)

A safety measure which also makes your life much easier, Adaptive Cruise Control uses radar installed in the front grille to judge distances between itself and the vehicle in front, and automatically adjusts the vehicle's speed* to maintain the designated distance. When there is no vehicle in front it acts just like a conventional cruise control system. *UK models display speed in miles per hour (mph).

NO VEHICLE IN FRONT

Your selected speed is maintained even if you remove your foot from the accelerator pedal.

VEHICLE IN FRONT

Your selected distance between vehicles is maintained.

VEHICLE IN FRONT (SLOWING/STOPPING)

When the vehicle in front slows or stops, ACC slows or stops your vehicle.

LANE DEPARTURE WARNING (LDW) (4hs)

A camera is used to monitor the lane position in front of the vehicle. If the vehicle deviates from its lane audible and visual warnings are activated.

FORWARD COLLISION MITIGATION (FCM) (4hs)

The PHEV's radar is used to detect obstructions including pedestrians, in front of the vehicle and to issue warnings when there is a danger of collision. Additionally, automatic braking is performed to avoid collision or reduce impact.

DANGER OF COLLISION

Warning + braking assistance

HIGH DANGER OF COLLISION

Warning + auto braking

EXTREMELY HIGH DANGER OF COLLISION

Warning + strong auto braking

FIVE-STAR SAFETY

Awarded the full five stars in Euro NCAP crash tests, the Outlander PHEV is outstanding when it comes to safety. It features a stability and traction control system which identifies and corrects any oversteer or understeer caused by overly ambitious acceleration, as well as particularly clever ABS which include power assisted emergency braking, automatic activation of the hazard warning lights during emergency braking, and the self-explanatory Hill Start Assist. There are a plethora of highly sophisticated active safety features, like the 360° camera which eliminates all parking blind spots, Blind Spot Warning and Rear Cross Traffic Alert which enhance safety during common manoeuvres like overtaking, lane changes and reversing out of parking spaces, and even features like Adaptive Cruise Control which will automatically match your speed to that of the vehicle in front. But, should the worst happen, the PHEV has been designed and engineered to meet the most stringent safety requirements whilst improving pedestrian protection, minimising damage to lighter vehicles and reducing repair costs in the event of low-speed impacts. No fewer than seven airbags provide further protection.

BLIND SPOT WARNING (BSW)

This safety feature uses radar sensors in the rear bumper to detect vehicles in your rear blind spots, on the right and left sides.

An indicator appears in the door mirror when BSW is active and the turn signals are off. When a vehicle is detected while the turn signal is on, an indicator blinks in the corresponding door mirror and a buzzer sounds.

REAR CROSS TRAFFIC ALERT (RCTA)

Radar detects an approaching vehicle when reverse gear is engaged, providing visible and audible warnings.

The same radar system can detect following vehicles in neighbouring lanes during highway driving and alert the driver to their proximity if a lane-changing manoeuvre is signalled.

360-DEGREE CAMERA (4h/hs)

UNINTENDED ACCELERATION MITIGATION SYSTEM (UMS) (4hs)

Front and rear parking sensors detect obstacles and automatically control the motor output when the accelerator is pressed.

ENGINEERED FOR A BETTER LIFE

As the epitome of intelligent motion, life with the Outlander PHEV is cost-effective, comfortable and very convenient. The batteries will recharge fully in less than four hours from a 240V/16A charge point supply and the vehicle is supplied with a cable which allows you to charge it from a dedicated 13 Amp socket in around five hours.

Of course, there are now thousands of public charging points throughout the UK, as well as an increasing number of public rapid chargers which will deliver an 80% charge in just 25 minutes. You can set timers or use your smartphone to remotely control the charging, to make the most of cheaper tariffs for example, and the same technology allows you to pre-heat or cool the cabin before your journey, even whilst the vehicle is on charge – how clever is that?

The Outlander PHEV is the world's greenest off-roader. It will broaden your horizons and enable you to look after yourself and your pocket without compromise. And it will help you to do a little for the planet too.

A SMART WAY TO OPERATE

A free app for your Smartphone – Android™ or iPhone – enables the remote operation of many functions in the Outlander PHEV. You can monitor and activate battery charging and change the timer settings, check the alarm, operate the parking lights and headlights, even control the temperature by choosing to defrost, heat or cool the cabin, all without leaving your armchair.

EASY PLUG-IN CHARGING AT HOME

CONVENIENT CHARGING CABLE STORAGE

A DIFFERENT HERO TO AID YOU

When you buy an Outlander PHEV, you get a safe and reliable vehicle that is a real pleasure to drive. Of course it is new technology, but the technology is tried and tested: already there are more than 100,000 Outlander PHEVs on European roads alone. Nevertheless, as with anything a little different, it's good to know you are protected should you ever encounter a problem – it's why we have **me&my**.

The PHEV comes with a comprehensive **5-year/62,500-mile warranty**, whilst the *traction battery has 8 years/ 100,000 miles (first 24 months unlimited, thereafter 36/*72 months or 62,500/*100,000 miles from date of first registration, whichever occurs first), 12-years anti-corrosion perforation warranty.

With the **Mitsubishi Assistance Package (MAP)** we go the extra mile. For the first three years following registration our assistance programme is there to help should you breakdown at the roadside or at home. It provides vehicle recovery following a breakdown or accident and help if your vehicle is stolen or vandalised and, if you should accidentally fill up with the wrong fuel, don't worry – we'll be there for you then too. What's more, you're covered 24/7 in over 30 countries throughout Europe. So whether you're on the daily school run or cruising through the Alps on your holidays, it's comforting to know that if the unexpected does happen, help is always at hand.

"If you want an SUV with tax-busting emissions ratings and the potential for tiny fuel bills, then nothing comes close on price." Auto Express

me & my MITSUBISHI

And should you be unlucky enough to have an accident we have **Mitsubishi First** – our customer support service for all Mitsubishi drivers following an accident. No matter which insurer you use, Mitsubishi First smooths your progress through an insurance claim, handling everything on your behalf – no hassle, no claim forms, no running about, and absolutely no cost to you.

And once you're part of the family... it's service with a smile.

A **Mitsubishi Service Plan**, purchased at the same time as your PHEV, covers the first three scheduled services for a modest sum. It can be included in your vehicle's finance and transferred to a new owner if you sell.

Mitsubishi Motors also offer superior insurance cover at a competitive price which is specifically designed for Mitsubishi vehicles and uses only genuine parts and approved repair centres.

All quotations from owners are excerpts from genuine owner reviews posted on reputable websites.

BUY YOUR NEW MITSUBISHI ONLINE

MITSUBISHI

ONLINE**

FIND YOUR PERFECT NEW MITSUBISHI FROM THE COMFORT OF YOUR OWN HOME

We've taken the inconvenience out of buying a new car. Our new online system will help you find your perfect Mitsubishi. No haggling. No surprises. You don't even need to leave the house.

HOW BUYING ONLINE WORKS

1. SET YOUR BUDGET

Decide how much you want to pay and choose finance to suit you

2. PART EXCHANGE

Get a valuation for your existing car

3. SELECT YOUR MODEL

Choose from a range of Mitsubishi models

4. ADD OPTIONS AND EXTRAS

Choose colours, interior, accessories and extras

5. CHECKOUT

Complete your purchase online

6. COLLECTION / DELIVERY

Collect your new car or have it delivered to your home or workplace

WITH MITSUBISHI BUY ONLINE, YOU'RE IN COMPLETE CONTROL

BOOK A TEST DRIVE TO SUIT YOU

It's up to you if and when you take a test drive. Mitsubishi Buy Online lets you book a test drive at any step along the way. Pick a time to suit you at any of our dealerships across the country.

COMPLETE FLEXIBILITY

You can save your chosen model, part exchange valuation and finance preferences at any point along your Buy Online journey. Your Mitsubishi will be saved in your customer account, ready to pick up where you left off.

COMPARE AND CONTRAST DEALS AND MODELS

You can adjust your finance preferences, compare deals and find out more about your chosen options.

For full details visit buy.mitsubishi-cars.co.uk. Terms and conditions apply

VEHICLE FINANCE

A QUICK GUIDE TO MITSUBISHI FINANCE

Drive away in your new or used vehicle with a finance arrangement that is right for you. You might not even need an upfront payment, and payments are fixed for the duration of the agreement so you can budget more easily. Our range of finance choices means you can find the right one to suit you.

Please note that some of the finance options shown below may not be available for Mitsubishi Buy Online.

HIRE PURCHASE

- Flexible deposit options – 0% deposit may be available subject to status
- Balance (plus fixed interest) pay over the chosen period 1-5 years in equal monthly payments
- After all the payments have been made, you own the vehicle

PERSONAL CONTRACT PURCHASE (PCP)

- Flexible deposit options – 0% deposit may be available subject to status
- Balance (plus fixed interest) pay over the chosen period 2-3.5 years in equal monthly payments. A significant proportion of the total amount payable has been deferred into the optional final lump sum payment.
- At the end of your chosen period you have 3 options:
 - 1 Renew – part exchange it for a new model*
 - 2 Retain – pay the final lump sum to own the vehicle
 - 3 Return – return the vehicle to Shogun Financial Services (under the goods return option)**

LEASE PURCHASE

- Flexible deposit options – 0% deposit may be available subject to status
- Balance (plus fixed interest) pay over the chosen period 2-4 years in equal monthly payments
- At the end of your chosen period you have 2 options:
 - 1 Part exchange for a newer model*
 - 2 Own the vehicle by paying the final lump sum payment*

CONTRACT HIRE FOR BUSINESS CUSTOMERS

- Flexible advanced rental
- Fixed regular rentals over 2-5 years
- At the end of the contract return the vehicle***

PERSONAL CONTRACT HIRE

- Flexible advanced rental
- Fixed regular rentals over 2-5 years
- At the end of the contract return the vehicle***

* Subject to settlement of your existing finance agreement, new finance agreements are subject to status.

** If the vehicle is in good condition and has not exceeded the agreed maximum mileage, you will have nothing further to pay. If the vehicle has exceeded the agreed maximum mileage, a charge for excess mileage will apply. Further information on what is considered good condition can be found at www.mitsubishi-cars.co.uk/goodconditionguide

*** No ownership option. The vehicle must be returned to us in a condition that meets the BVRLA Fair wear and tear* guidelines, otherwise charges may be incurred. Fair wear and tear guidelines can be found on the BVRLA website at www.bvrla.co.uk. Excess mileage charges will apply if you exceed the agreed contract mileage.

For full details visit www.mitsubishi-cars.co.uk/finance. Terms and conditions apply

Finance is subject to status and is only available to UK residents aged 18 and over. Credit products are provided by Shogun Finance Limited, trading as Shogun Financial Services, 116 Cockfosters Rd, Barnet, EN4 0DY. Contract Hire is provided by Shogun Vehicle Leasing (a trading style of Lex Autolease Ltd, SK3 0RB).

ACCESSORISE YOUR OUTLANDER PHEV

Put your Outlander PHEV through its paces yet keep it in showroom-perfect condition with the special Protection Pack, comprising of door entry guards, rear bumper protection plate, mud guards, mat set* and boot tray all shown below. These are just a few of the items available in the wide range of approved accessories which will make the Outlander PHEV fit your lifestyle perfectly; they all benefit from a 3-year 62,500-mile warranty if fitted at the time of purchase. So before you place your order, consider carefully: talk to your dealer or visit the Outlander accessories website at www.mitsubishi-cars.co.uk/accessories and make sure you make the most of your choice.

1. Mat set (Elegance)
2. Rear bumper protection plate
3. Boot tray
4. Front and rear door entry guards
5. Front mudguards
6. Rear mudguards

*Protection Pack mat set differs from that shown.

- 7. Front parking sensors (standard on 4hs)
- 8. Rear parking sensors (standard on 4hs)
- 9. Chrome door handles
- 10. Chrome mirror covers
- 11. Rear dog guard
- 12. Tailgate garnish
- 13. Cargo floor net

KEY FEATURES

SPECIFICATION AS 4h PLUS:

- Premium Nappa leather seat trim (Claret Red, Porcelain Cream or Gunmetal Grey) including front/rear door and centre armrests
- Premium 5-piece floor mat set colour-coded to leather
- Premium Alpine audio system
- Heated rear seats
- LED exterior and interior lighting
- Blue LED door courtesy lamps and front/rear footwell mood lighting

PHEV 5hs

2.4 4WD AUTOMATIC

KEY FEATURES

SPECIFICATION AS 5h PLUS:

- Forward Collision Mitigation system with pedestrian detection
- Lane Departure Warning
- Adaptive Cruise Control
- Unintended Acceleration Mitigation System
- Front and rear parking sensors
- Headlamp auto high beam

TECHNICAL SPECIFICATIONS

Outlander PHEV Juro, 4h/hs, 5h/hs

ENGINE			
Engine type	2.4-litre in-line 4-cylinder 16-valve DOHC MIVEC Atkinson cycle petrol engine		
Fuel system	Electronically controlled multi-point injection		
Fuel type	Unleaded		
Displacement	cc	2360	
Bore x stroke	mm	88.0 x 97.0	
Compression ratio	12.0		
Maximum output	kw (PS) at rpm	99 (135) / 4500 rpm	
Maximum torque	Nm (lbft) at rpm	211 (156) / 4500 rpm	
MOTORS/BATTERY			
Front motor	rated output	kw (PS)	25 (35)
	maximum output	kw (PS)	60 (82)
	maximum torque	Nm (lbft)	137 (101)
Rear motor	rated output	kw (PS)	30 (41)
	maximum output	kw (PS)	70 (95)
	maximum torque	Nm (lbft)	195 (144)
Battery (main traction)	type	Lithium-ion	
	volts	300	
Capacity	kWh	13.8	
Charging time ¹ (approx)	13 Amp supply	5 hours	
	16 Amp supply	3.5 hours	
	rapid charge to 80%	25 minutes	
PERFORMANCE			
Maximum speed	Electric (EV) mode	mph (kph)	83 (135)
	Hybrid (HV) mode	mph (kph)	106 (170)
Acceleration	0-62 mph	secs	10.5
OFFICIAL FUEL CONSUMPTION/EMISSIONS ²			
Electric energy consumption (weighted combined)		miles/kWh (km/kWh)	3.68 (5.92)
Electric driving range (weighted)	highway driving	miles (km)/charge	28 (45)
	city driving	miles (km)/charge	35 (57)
Fuel consumption (weighted combined) ³		mpg (lts/100km)	139.7 (2.0)
CO ₂ emissions (weighted) ³		g/km	40
Emissions compliance	Euro 6d-temp		
SUSPENSION/STEERING			
Front axle	MacPherson strut, coil springs, telescopic shock absorbers, stabiliser bar		
Rear axle	Trailing arm multi-link, coil springs, telescopic shock absorbers, stabiliser bar		
Brakes	Anti-lock Braking System with Electronic Brakeforce Distribution (ABS + EBD), Brake Assist (BA), Hill Start Assist (HSA) and Emergency Stop signal System (ESS)		
	Front / Rear	320mm (12.6") ventilated disc (2-pot) / 302mm (11.9") disc	
Steering	Rack and pinion, electronic power-assisted		
Minimum turning circle	m (ft)	10.6 (34.8)	
Wheels / Tyres	18 x 7.0J alloy / 225/55R18 98H		
DRIVELINE/TRANSMISSION			
Type	Front transverse petrol engine with front and rear electric motors		
Driveline	Super All Wheel Control (S-AWC) incorporating Twin Motor 4WD, Active Stability and Traction Control (ASTC), Active Yaw Control (AYC) and Anti-lock Braking System (ABS)		
DIMENSIONS			
Exterior l x w x h	mm	4695 x 1800 x 1710	
Exterior width over extended door mirrors	mm	2120	
Ground clearance (unladen)	mm	190	
Track	Front / Rear	mm	1540 / 1540
Wheelbase	mm	2670	
Approach angle Departure angle Ramp breakover	degrees	21.0 22.5 19.0	
WEIGHTS/VOLUMES			
Seating capacity	5		
Fuel tank capacity	lts (imp.galls)		
Cargo capacity minimum	(to window level)	lts VDA (cu.ft.)	463 (16.3)
	(to roof)	lts VDA (cu.ft.)	731 (25.8)
Cargo capacity maximum	(to window level)	lts VDA (cu.ft.)	886 (31.2)
	(to roof)	lts VDA (cu.ft.)	1602 (56.5)
Gross vehicle weight	kg	2390	
Kerb weight	kg	1880	
Towing capacity	Braked / Unbraked	kg	1500 / 750
Trailer nose weight	kg	75	
Roof loading capacity	kg	80	
SERVICING/WARRANTY			
Service intervals	Every 12,500 miles or 12 months, whichever occurs first		
Warranty	5 year/62,500 mile vehicle warranty except the *traction battery which has 8 years/100,000 miles (first 24 months unlimited mileage, thereafter 36/*72 months or 62,500/*100,000 miles from date of registration, whichever occurs first). 12 years anti-corrosion perforation warranty. 3 years Pan-European roadside, home and accident assistance		

¹ Charging time may vary depending on the condition of the battery, ambient temperature and Rapid Charger specification.

² These figures were obtained using a combination of battery power and petrol. The Outlander PHEV is a plug-in hybrid vehicle requiring mains electricity for charging.

Figures shown are for comparability purposes only. Only compare fuel consumption, CO₂ and electric range figures with other cars tested to the same technical procedures.

These figures may not reflect real life driving results, which will depend on a number of factors including accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

³ There is a new test used for fuel consumption and CO₂ figures. The CO₂ figure shown however is based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.

MITSUBISHI MOTORS RECYCLING

We all have a duty to protect the environment. After a long working life we will take back any Mitsubishi Motors vehicle originally sold by The Colt Car Company Ltd. and recycle it in an environmentally friendly manner in accordance with the EU Directive on End-of-Life Vehicles and any applicable national statutory provisions.

All Mitsubishi Motors vehicles sold by The Colt Car Company Ltd., irrespective of date of sale, will be taken back free of charge from the last owner, at one of the designated take-back points, provided the vehicle contains all major components and is free of waste.

For further information please visit www.cartakeback.com, email info@cartakeback.com or call the Cartakeback info-line on 0845 257 32 33.

Mitsubishi Motors policy is one of continuous product development and the right is reserved to change specification, features and prices without prior notice. The specification of vehicles illustrated in this publication may not be applicable to the UK market. Although every effort has been made to ensure that the written information was accurate, up-to-date and consistent with UK specification at the time of going to press, this brochure should not be regarded as infallible and, as such, does not constitute an offer for the sale of any particular vehicle. No part of this publication may be reproduced in any form or by any means, without the prior written permission of The Colt Car Company Limited.
