FROM JOHN CLARK MOTOR GROUP

# VEHICLE PROTECTION PRODUCTS

---

**Nobody knows what tomorrow may bring.**

That's why it's better to be prepared for any surprises that pop up along the way. Here at John Clark Motor Group, we have four aftercare products that will keep your vehicle protected against whatever life has in store.

## PAINT & INTERIOR PROTECTION

---

**Maintain the showroom shine of your vehicle with a long-lasting treatment that repels dirt and road salt, and keeps it looking like new.**

It creates a tough, protective shield for your paintwork, improving resistance to sun fading, scratches and environmental contaminants such as bird lime. In addition, we also have treatments for glass and upholstery, offering protection from everyday wear and tear, those inevitable spillages and pet hair.

Professionally applied at the dealership, it locks in colour and provides a deep, glossy finish for paintwork that's easier to clean, with a lifetime guarantee that means there's no need to polish to maintain the showroom shine. When applied onto interior carpets, upholstery and leather, it protects against marks and unsightly stains. Whether that's food, drink or dye from your clothing. A windscreen coating also improves wet weather visibility. Keep that new car feeling inside and out for the lifetime of your ownership. Guaranteed.

---

## GAP INSURANCE

---

**Should your vehicle be involved in an accident which results in it being written off by your insurer, you could be seriously out of pocket!**

This happens when the cost of repairing it outweighs its market value. Our Guaranteed Asset Protection cover bridges the gap between the original price you paid for the vehicle and the insurance payout. Furthermore, it will pay off any outstanding finance you may have at the that time, leaving you free to buy a replacement vehicle hassle-free and with total peace of mind.

## TYRE & ALLOY WHEEL INSURANCE

---

**We all know how easy it can be to kerb an alloy, or damage a tyre after hitting a pothole.**

Tyre and alloy insurance covers you for unlimited puncture repairs and the like for like replacement of up to five tyres to keep you on the move, as well as 10 alloy wheel refurbishments. You have invested in those wheels, so why not keep your car looking its best whilst maximising its resale value? The protection also extends to cover malicious damage, so should you suffer the misfortune of having your tyres slashed, you won't need to worry about the expense of replacement – we've got it covered.

---

## SMART COVER INSURANCE

---

**Wouldn't it be a shame if the no claims bonus you had built up over many years was lost due to a minor scratch or dent on the bodywork?**

With our smart repair insurance, your vehicle can remain in optimum condition without you having to make needless insurance claims.

Simply process your claim and arrange the repair via the Smart Cover App as soon as it's happened and we'll do the rest. Before you know it, a fully trained bodywork technician will be out to carry out the Smart repair at your home or work at a time that suits you.

It's a clever way of carrying out localised repairs, without the need to repaint an entire panel. It's also much quicker too.

And all repairs are guaranteed for the lifetime of ownership.

**Get smart, and get Smart Cover.**
