

The A-Class Saloon

Price List as of 1st January 2021

Mercedes-Benz

Welcome

At Mercedes-Benz we appreciate the importance of detail. Over the following pages you'll find model prices and a breakdown of standard and optional equipment, as well as details of the attractive finance offers and benefits that are available to every Mercedes-Benz driver.

We have highlighted some of the best styling features both inside and out, some of the new technology features and some body styling options which all combine to give you a unique driving experience. To experience a full listing of what is available; please speak directly to your local Mercedes-Benz Dealer.

Of course, some things have to be experienced to be truly appreciated, such as the qualities that set a Mercedes-Benz apart, which is why we'd like to invite you for a test drive at your local Mercedes-Benz Dealership. Discover the location and the contact details of your local Mercedes-Benz Dealership at www.mercedes-benz.ie

CO2 range: 130 – 120 g/km and 5.7 – 5.2 l/100km.

The saloon. Now also as an A-Class.

One of the most traditional automotive shapes has now become one of the most cutting-edge designs. The new A-Class Saloon interprets the 3-box design more sportily than ever.

More spacious feeling.

The image shows the front interior of a Mercedes-Benz A-Class Saloon. The focus is on the dashboard area, featuring the MBUX infotainment system with a large screen displaying a music player interface. Below the screen are four circular air vents with a Mercedes-Benz logo in the center. The dashboard is finished with a light-colored, textured material. The background is a blurred view of a parking garage with a red and white striped barrier and a blue door.

Knows the way home. And your habits.

MBUX, the new Mercedes-Benz User Experience, makes the new A-Class Saloon more intelligent than ever before. It learns more every day and, most of all, gets to know its driver better all the time. It can remember your favourite songs and the way to work. It then automatically selects the right radio station or shows you a faster way if your usual route is congested. All by itself and as a matter of course, if that is what you want.

Energising comfort and exemplary safety.

Be it at rush hour, during a long drive at night or on an unfamiliar route, your new A-Class Saloon noticeably takes the strain off you, particularly in stressful situations. It's all down to a concept that makes every journey in a Mercedes-Benz a safer and exceptional experience: Mercedes-Benz Intelligent Drive. Because the time you spend behind the wheel is your time. Time for relaxation. Time to replenish your energy. So that, first and foremost, you reach your destination safely, but are also relaxed when you get there.

Each line a clear statement.

The sloping front end of the new A-Class Saloon gives it the streamlining to move against the flow. It features an upright radiator grille and a long, low bonnet line. Genuine highlights to left and right: the optional MULTIBEAM LED headlamps simply exude innovative power. As a consequence, the new A-Class Saloon appears to hug the road even more closely. And make our hearts beat faster.

The rear end of the A-Class Saloon.
The beginning of a new design era.

The new and puristic styling of the A-Class finds elegant fulfilment in the Saloon: it features a distinctive rear end, in which two-piece tail lamps add to the impression of breadth. Not just great looking, but also great in terms of size, is the load compartment behind all this. And with the option of the HANDS-FREE ACCESS function, it even comes with contactless opening.

The new A-Class Saloon.

With Mercedes 

Safety and assistance.

Thanks to radar sensors and a 3D stereo camera, the new A-Class Saloon monitors its surroundings and is able to maintain the correct distance to the vehicle ahead at speeds of up to 210 km/h as well as brake automatically in an emergency situation.

MULTIBEAM LED*.

MULTIBEAM LED headlamps adapt to the visibility conditions and other road users within a split second. The partial main beam, for instance, masks out identified road users, so ensuring that the road surface is always ideally illuminated without dazzling oncoming vehicles.

* Optional equipment..

Mercedes-Benz User Experience.

MBUX (Mercedes-Benz User Experience) doesn't do the driving for you, but it makes the experience as enjoyable as possible. Artificial intelligence means that the system is capable of learning so that, over time, it gradually adapts itself better to the driver. You can converse with the LINGUATRONIC intelligent voice control system almost as naturally as you would with a good friend.

Smartphone Integration*.

In the new A-Class Saloon you can charge your smartphone by placing it on the centre console. And the best thing: thanks to near-field communication (NFC), your smartphone immediately connects to the A-Class Saloon without a lot of intermediate steps or having to enter a code.

Sending text messages or scrolling through contacts is also no problem at all. In the new A-Class Saloon you can use your smartphone without having to pick it up. Use USB or NFC to connect to the vehicle. Then conveniently control almost all apps and functions via the multimedia system display using the Touch Control buttons on the steering wheel.

* Optional equipment..

“Wrap-around” design.

The interior of the new A-Class Saloon literally hugs the occupants. Smooth transitions between instrument panel, centre console and door trims create the pleasant wrap-around design. This is just as unique in this category as the selection of trim elements and ambient lighting to stage every detail perfectly.

Widescreen display.

Here one glance says more than a thousand words. The interior of the new A-Class Saloon has a strikingly unusual appearance, giving you a completely new view of things. Not just on one, but on two high-resolution displays, 17.78 centimetres (7 inches) in size as standard. Or extra-large, at 26 centimetres (10.25 inches) as an option. In either case, the screens seem to be floating within the interior. They are also super-easy to operate using the Touch Control buttons on the steering wheel, the optional touchpad or the touchscreen. The latter represents another “world first” that is definitely worth another look.

Head-up display*.

You will automatically have your eyes on the road with the head-up display in the new A-Class Saloon, because it directly projects all relevant information, such as speed, speed limits or navigation information into your field of vision. Virtually and in full colour. The content of the display can be adapted and saved as part of the memory function.

Seating comfort and spaciousness.

If you take a look around in the new A-Class Saloon, you may be surprised to find just how spacious it is. In the rear, in particular, even tall occupants will enjoy the ride. The new A-Class features sports seats with adjustable head restraints. Multicontour seats are available in conjunction with luxury seats. Seat climate control and different upholstery may be selected as options. It all adds up to top-class travelling comfort.

* Optional equipment..

The Style design and equipment line (standard).

With the Style design and equipment line your car stands out from the standard equipment. A youthfully cool look inside and out. This includes additional features such as the 16-inch light-alloy wheels plus upholsteries and topstitching in trendy colours which are exclusive to the line.

The Progressive design and equipment line* from €843

The Progressive design and equipment line substantially enhances your car. Added value you can see and feel. From every perspective the excitement and high-quality engineering associated with a premium compact car are intensified.

The AMG Line from €2,779

With the AMG Line, you make a clear statement for performance inside and out. Above all, the AMG bodystyling with special front and rear aprons lends the car a resemblance to AMG models. In addition, the technical features with lowered, sportily tuned suspension and the Direct-Steer system serve to intensify the driving experience.

DYNAMIC SELECT.

Just drive as you want to. At the press of a button DYNAMIC SELECT offers different drive programs with setting options for the engine, transmission, chassis and steering, for instance. With the “Sport” mode you drive decidedly dynamically, with the standard “Comfort” program very harmoniously. “ECO”, on the other hand, places the emphasis on maximum efficiency, saving both fuel and money.

The “ECO” drive program gives you particularly comprehensive support when you want to avoid CO₂ and pollutants. The seat heating and air conditioning work with reduced output in this setting and thus also save valuable energy. With “Individual”, you choose all the respective parameters yourself. This means that you can select a sporty setting for the drive system and at the same time have a comfortable setting for the chassis.

Comfort suspension.

Enjoy a high level of comfort on long motorway stretches while tackling tight curves with sporty flair. The balanced comfort suspension provides an impressive mix of responsive

suspension reserves with excellent driving stability. This makes your driving safe while at the same time providing a great deal of driving pleasure.

More information about the official fuel consumption and the official specific CO₂ emissions of new passenger cars is available in the publication entitled "Leitfaden über den Kraftstoffverbrauch, die CO₂-Emissionen und den Stromverbrauch neuer Personenkraftwagen" ["Guidelines concerning the fuel consumption, CO₂ emissions and electricity consumption of new passenger cars"], available free of charge from all retailers and from Deutsche Automobil Treuhand GmbH (www.dat.de). The figures are not based on an individual vehicle and do not constitute part of the product offer; they are provided solely for purposes of comparison between different vehicle models. The figures will vary according to the optional equipment selected. ⁵ Information only valid within the European Union. May vary from country to country. ⁶ Determined on the basis of the measured CO₂ emissions, taking into consideration the vehicle mass. Only valid for Germany. For more technical data, please visit www.mercedes-benz.com
