

EXPLORE A WHOLE NEW WORLD.

Enjoy the freedom to roam wherever you want, including cities with emission restriction zones. Highly versatile, and as agile and compact in the city as it is robust and energetic on the open road, the all-new PEUGEOT e-2008 SUV offers rapid charging* and a range of 193 miles WLTP** with zero CO₂ emissions. Travelling is made easier with pre-programmable heating and charging functionality^ - available via the colour touchscreen or through the MyPeugeot App.

* 80% charge in 30 minutes at 100kW fast charge terminal.

** Equivalent to 248 miles NEDC. Estimated data, provided for information purposes only, subject to certification.
^ An app to remotely manage features (battery level, pre-programming heating and air conditioning, driving stats, etc.)

ELECTRIC SENSATIONS.

Savour the unexpected sensations of an all-electric vehicle and enjoy sharp acceleration thanks to immediate engine torque, together with a smooth and silent drive without vibration.

The all-new PEUGEOT e-2008 SUV boast the same powerful, fluid and generous lines as the combustion versions, but adopts some exclusive and distinctive design features. These include a body-coloured chequered front grille and dichroic Lion which changes colour from different angles; an "e" monogram on the front side panel and tailgate; and exclusive Alcantara® Gréval Grey seat trim.*

*According to version.
