

Channel Commercials PLC Environmental Policy

Channel Commercials PLC is committed to providing a safe and healthy workplace and reducing its environmental impact. When carrying out work activities, Channel Commercials PLC considers the effects on the wider environment and aims to minimise any harmful impact so far as is reasonably practicable.

The Board of Directors of Channel Commercials PLC is committed to the management of their environmental aspects and seeks to:

- Ensure compliance with the requirements of ISO 14001:2015.
- Strive to ensure a minimum of legal compliance as a standard, however, wherever reasonably practicable, the company will strive to exceed the requirements of relevant environmental legislation.
- Take all essential measures to prevent pollution whilst handling oils, fuels and other hazardous materials associated with their work activities and facilities.
- Maintain the continual improvement of its environmental performance through the regular review of its management system.

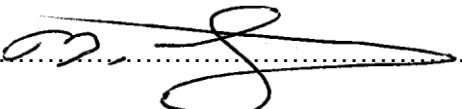

In seeking to maintain the environmental performance improvement of the company we will:

- Review the organization's raw material resources to ensure that, wherever possible, recycled materials are employed, the use of non-renewables is minimised and energy is directed towards sourcing sustainable materials and processes.
- Conserve energy wherever possible, seeking to reduce its use of fossil fuels.
- Maintain waste-saving protocols to ensure the recovery of recyclable material.

In order to put into effect the intention of the Board, the Integrated Management System (IMS) Manual contains the approved company process documentation for all environmental matters. The policy documents are generated, approved, and monitored by Channel Commercials PLC in response to legislative requirements and good industrial practice. We monitor and fully audit the progress of our business against the standards and objectives we have defined in our full policy.

The Company maintains a continuing interest in environmental matters at all levels and will issue new or amended policies from time to time. Suggestions from employees, customers and the public regarding environmental policy are welcome and should be addressed to the Managing Director.
