F-PACE's Adaptive Dynamics<sup>1</sup> works with Configurable Dynamics<sup>2</sup>, so that you can shift from one driving style and one set of road conditions to another. ## **ALL-WHEEL, ALL-WEATHER.**

F-PACE's All Wheel Drive (AWD) system combines the agility and character of Rear Wheel Drive (RWD) with the added security and traction of AWD. In normal driving conditions, F-PACE is predominantly RWD for better handling and balance. But when roads or conditions become more challenging, the system subtly channels power for optimum traction and more comfortable progress. This is when Jaguar's Intelligent Driveline Dynamics (IDD) kicks in, using sensors measuring throttle and steering inputs to anticipate wheel slip. IDD seamlessly co-ordinates these inputs, and compares them with responses from the engine, transmission and traction control systems to calculate the traction available and distribute torque accordingly, even before grip is lost.
