Renault ZOE

Although every effort has been made to ensure that the information contained within this brochure is as accurate and up to date as possible, Renault Ireland reserves the right to modify its models without notice, including their characteristics, specifications, equipment and accessories. Brochures inevitably become out of date or inaccurate in some respects, in that such characteristics, specifications equipment, or accessories may be changed after the publication date given below and can differ from the descriptions given or the photos displayed. It is therefore necessary to check with your Renault Dealer before purchasing any product that the characteristics, specifications, equipment or accessories of the vehicle on order are as advertised.

Renault recommends 

 Prodigious

Z.E.

Simply revolutionary...

Rediscover the pleasure of driving with Renault ZOE. Experience cutting edge technology, and a revolutionary range, join the electric revolution.

*Homologated range according to NEDC test cycle, for comparison purposes, 400 km, and may not reflect real life driving results.

**WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 200 km in winter and 300 km in summer, depending on the factors above. See Driving Range page for more information.

Renault Zero Emissions

Always a step ahead

Renault Z.E. has been pushing the boundaries of innovation since revealing the Z.E. concept car in 2008. Since then, we have been fulfilling our commitment and developing our technology so that our vehicles stay at the forefront of the electric vehicle market. In 2016 we launched ZOE with the Z.E. 40 battery, with almost twice the capacity of the previous version. Finally, 2018 sees the introduction of the R110 motor, bringing ZOE more power than before.

First place on the track - first choice on the road

Our commitment to electric motoring innovation runs deeply in Renault's brand DNA. We were a founding partner in Formula E™, the FIA's newest race series. Winning the team championship in 2014/15 and 2015/16 seasons, along with the driver's championship in 2015/16, proves superior electric technology on the track and, as Europe's number one selling EV brand**, on the road.

Easy Electric Life

Electric mobility does not have to be more complicated than fuel-powered cars.

Far from it, electric power comes as second nature in most areas of our lives - have you ever thought about filling up your smartphone with fuel? Your car does not need to be any different from your phone, simply put it on charge before you go to sleep and it will be ready for you in the morning.

The ZOE Experience

We were amongst the first manufacturers to launch a range of affordable 100% electric vehicles.

We have years of experience helping customers to integrate electric vehicles into their lives, and we have a community of happy ZOE customers to prove it. We are now more than ready to make the electric revolution easy and accessible to everyone. See the [Will the ZOE fit my lifestyle?](#) page to see what are customers think of living with the Renault ZOE.

Electric identity

A chrome diamond on a wide, black radiator grille, streamlined blue-tinted headlamps and transparent rear lights with concentric blue edges give ZOE a strong electric identity.

Effortless, clean styling throughout

ZOE has the stylish appearance of a coupe thanks to built-in rear door handles, which have been branded with the designer's fingerprint. Combined with an interior design that is thoughtful and spacious, ZOE offers the best of both worlds.

Technology and innovation

Z.E. Connected Services

To keep you and your ZOE in sync, there are two Z.E. Connected Services available. These can be controlled using a smartphone or computer.*

My Z.E. Connect. Remotely monitor your battery charging status.

My Z.E. Interactive. Remotely charge your battery, pre-condition your car so it's at the desired temperature before you start your journey and set a charging schedule to make the most of off-peak energy tariffs.

* 3 years free subscription of Z.E. Connect on all models and 3 years free subscription of Z.E. Interactive for Dynamique Nav, S Edition and Signature Nav. Z.E. Connected Services is compatible with Apple iOS® and Android® devices and is available in the App store and Google Play® store.

Renault R-Link

The Renault R-Link multimedia system delivers an enriched driving experience and is tailored to your ZOE. The intuitive and touch sensitive 7" screen is extremely easy to use and there are a range of apps dedicated to motoring available to purchase as well as the ability for Bluetooth® audio streaming and hands-free calls.*

ZOE driving range and charging points

You can easily view the current driving range, how efficient your driving is and also locate the nearest charging points.

Android Auto (R) compatible.

This new functionality allows you to connect your Android phone to the car and make the most of some of your favourite apps, like Deezer, Spotify, and Waze, to make your journeys even easier.

Make hands-free phone calls

Manually enter numbers or use your contact list to make and receive calls whilst you concentrate on driving*.

*For compatible devices, please refer to <https://www.renault.ie/services/multimedia/compatibilite-bluetooth.html>

New Z.E. 40 battery

Renault's Z.E. 40 battery stores twice as much energy as its predecessor, despite having exactly the same dimensions! This allows you to travel further while benefitting from the simple recharging, no battery maintenance, and easy recycling at the end of its life.

Located under the floor to lower the centre of gravity, the battery has no impact on either roominess of the car or on the boot volume. ZOE offers 100% torque from start, a quiet motor, no gear changes or petrol stations, **and relaxed driving pleasure.**

Innovation for a better life

What is the purpose of innovation, if it doesn't offer a tangible benefit?

That's why all of ZOE's innovative features are specifically designed in order to make your electric life even easier.

1. Regenerative braking:
Every time the driver brakes, the battery gets a boost of energy. Clever!

2. Heat pump:
The heat pump is able to air-condition and heat your car more efficiently than a traditional system, meaning you can stay comfortable without worrying about range.

3. EV tyres:
Specifically designed for ZOE, these tyres are able to maximize ZOE's range due to ultra-low rolling resistance technology.*

4. Chameleon Charger™:
Uniquely fitted to ZOE, the Chameleon Charger™ is always able to charge at the maximum power available and is therefore quicker and more efficient, saving you time and money.

5. Pre-conditioning:
Through Z.E. Connected Services** you can pre-set the temperature of the car so it's ready for you before you get in. Toasty in winter and cool in summer!

6. Eco-mode:
When using the eco-mode, the dynamic performance and air conditioning or heating is limited to maximize ZOE's driving range.

*Not available on 17" tyres. ** 3 years free subscription of Z.E. Connect on all models and 3 years free subscription of Z.E. Interactive for Dynamique Nav, S Edition and Signature Nav. Z.E. Connected Services is compatible with Apple iOS® and Android® devices and available in the App Store and Google Play® Store.

What makes ZOE so special?

No fuss, zero CO₂ emissions*, easy to drive - these are all the things we love about Electric Vehicles and all the things that the Renault ZOE stands for. There are many benefits to owning a Renault ZOE, including:

Easy Electric Life. Renault Z.E. makes the electric revolution easy. We provide you with all the basics you need to integrate ZOE into your life, including your home charging solution. There is nothing left to worry about!

SEAI support Wall-Box installation. If you have an off-street parking space and you are a private customer. SEAI support your home charging point installation with a Grant at €600.

Chameleon Charger™. Our innovative Chameleon Charger is unique to ZOE and ensures your ZOE is always able to charge at the maximum power available to it, saving you time and making the most of the any charging station whilst on the move or at home!

Truly Connected. A connected life is no longer a thing of the future. Z.E. Connected Services takes communication between smartphone and car to another level, allowing features such as remote charging, monitoring of your charge status and pre-conditioning.†

Style. We all want style in our lives and ZOE gives you just that. With its chrome diamond on a wide radiator grille, streamlined blue tinted headlamps and transparent rear lights, ZOE has its very own electric identity.

Low running costs. Charging ZOE at home is not only easy but cost effective as well. With an average full charge costing less than €4†, you will start saving money, journey after journey!

*CO₂ while driving: 0 g/km according to WLTP homologation tests. †Features available depend on qualifying subscription. See [Technology and Innovation page](#) for more information. † Less than €4 full recharge cost, calculated by (a) Board Gais Energy urban / rural nightsaver Price Plan Unit rate including VAT and (b) a full recharge of the 41kW battery.

Driving Range

Now that ZOE is available with Z.E. 40 Battery giving a revolutionary WLTP* range of 317 km on one charge, range anxiety is a thing of the past. With a real life estimate of 300 km in summer and 200 km in winter** ZOE is able to get you wherever you need to go with less need to recharge on the way, saving you time and money.

Range (miles)	Expression R90 Z.E. 40	Dynamique Nav, S Edition & Signature Nav R110 Z.E. 40	Cost in Pence p/per km†
WLTP*	317	300	1 cent
Summer (real world estimate)	300	280	1.5 cents
Winter (real world estimate)	200	180	2 cents

***What is the WLTP and why the real-life range is similar to it?**

Worldwide Harmonized Light Vehicles Test Procedures (WLTP), this new homologation protocol gives fuel consumption and driving range results that are much closer to real life conditions figures than the NEDC protocol.

While the old NEDC test determined test values based on a theoretical driving profile, the WLTP cycle was developed using real-driving data, gathered from around the world. WLTP therefore better represents everyday driving profiles.

WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 300 km in summer and 200 km in winter, depending on the factors above.

****Why is the range reduced in winter?**

Like all batteries, those in Z.E. vehicles are less efficient in cold weather than at warmer ambient temperatures. This means that you can expect a reduction in the range of your Renault Z.E. in the winter. Also, in winter you are more likely to use the heating, which means ZOE consumes more energy.

Charging times	Expression R90 Z.E. 40	Dynamique Nav, S Edition & Signature Nav R110 Z.E. 40	
7kW (0-100%)	7-8 hours	7-8 hours	This is the rate your home charging point will be charging at. The majority of your charging will take place here, typically at night. The average adult needs 8 hours of sleep and the same goes for ZOE!
22kW (0-100%)	2 h 40	2 h 40	On most journeys, there is no need to fully recharge and you will typically only top-up for half an hour at a motorway station. The perfect excuse for a cup of coffee.
43kW (0-80%)	1 h 40	1 h 40	Great for charging on a longer journey! Why not consider ZOE with Quick Charge option, which reduces charging time for ZOE with Z.E. 40 battery to 65 minutes. See Quick Charge Page

Illustrated range for ZOE with Z.E. 40 Battery

— Summer Range
— Winter Range

Different Journey and Charging Scenarios[^]

People's daily schedules can be very different. However, ZOE with Z.E. 40 battery can now accommodate even longer journeys.

Multiple short journeys summer

100 km roundtrip trip summer

250 km journey winter

KEY

- Driving Distance
- Charging Time

Did you know that...

- ...the average daily mileage is about 45 km[‡]? Even if you drove double that everyday, you would not even come close to ZOE's limits.
- ...ZOE's unique Chameleon Charger™ is clever and can adapt to different chargepoints? It is always able to charge at maximum power and is therefore quicker and more efficient. [See Battery and Charging page for more information.](#)
- ...there are many ways to maximize your range? ZOE's smart eco-mode, driver coaching tips, and regenerative braking are able to optimise your driving range.

† Less than €4 full recharge cost, calculated by (a) Board Gais Energy urban / rural nightsaver Price Plan Unit rate including VAT and (b) a full recharge of the 41kW battery.

[^]For illustration purposes only and based on the estimated driving range of ZOE with Z.E. 40 Battery available on ZOE Dynamique Nav, S Edition and Signature Nav. [‡]CSO Car Usage Statistics - average daily distance private car.

Battery and charging

Just like the other models in the Renault Z.E. range, ZOE is fitted with a lithium-ion battery, offering great performance. It is very simple to charge, even when it is fully discharged and it can also be recycled at the end of its life.

Thanks to The Chameleon Charger™ that is uniquely fitted to ZOE, it is compatible with various power sockets and sources, providing you with a range of charging options. The result? Minimised charging times and maximised flexibility.

Three easy ways to charge?

1. At Home. - A typical domestic EV charging point offers a 7kW charge that can fully charge the ZOE in 7-8 hours. Now that ZOE with Z.E. 40 battery can go even further, the majority of your charging will take place at home so that topping up the car can be effortlessly integrated into your daily routine.

2. Destination. There are already over 1,100 public charging posts nationwide that provide a charge between 3kW and 22kW and can charge your car from 3-16 hours respectively. This type of charge is ideal for round trips, such as going to and from one destination.

3. Quick. These appliances are placed at key locations such as motorway services and have a 43kW capacity. They are ideal for long journeys and can charge your ZOE with Z.E. 40 battery to 80% in 1h 45 mins. With Quick Charge option, this only takes 65 mins. **See Quick Charge page.**

Not sure where to find chargepoints around you?

Visit <https://www.esb.ie/our-businesses/ecars/charge-point-map> or download the ESB "ecar connect" app for Apple and Android devices to find public posts in your area!*

*Z.E. Explore is compatible with Apple iOS® and Android® devices and is available in the App store and Google Play® store.

Quick Charge

If you are likely to use your ZOE for long trips on the motorway where 43kW Quick Chargers are available why not consider ZOE Q90 Z.E. 40 Quick Charge?* The Quick Charge option enables your ZOE to charge from 0-80% in just 65 minutes, and lets you travel further, faster.

Range (km)	Expression Nav R90 Z.E. 40	Dynamique Nav/ S Edition / Signature Nav R110 Z.E. 40	Dynamique Nav/ S Edition / Signature Q90 Z.E. 40 Quick Charge	Charging times	Expression Nav R90 Z.E. 40	Dynamique Nav/ S Edition / Signature Nav R110 Z.E. 40	Dynamique Nav/ S Edition / Signature Q90 Z.E. 40 Quick Charge
WLTP**	317	300	300	7kW	7-8 hours	7-8 hours	8-9 hours
Summer	300	300	280	22kW	2 hrs 40	2 hrs 40	2 hrs 40
Winter	200	200	180	43kW (0-80%)	1 hr 40	1 hr 40	65 mins

ZOE Q90 Z.E. 40 Quick Charge makes longer journeys even easier.

400 km motorway journey summer[^]

KEY

- Driving Distance
- Charging Time

*Quick Charge Option results in a WLTP Range of 317 km and real life estimates of 300 km in summer conditions and 200 km in winter conditions.

**WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 300 km in summer and 174 km in winter, depending on the factors above.

† Less than 2 cents/ km based upon a €4 full recharge cost, calculated by (a) Board Gais Energy urban/ rural nightsaver Price Plan Unit rate including VAT, (b) a full recharge of the 41kW battery and (c) the km on one charge.

How it works - ZOE battery

ZOE pricing now includes the battery. This keeps purchase and ownership as straightforward as possible.

For your peace of mind, the battery is guaranteed for 8 years / 160,000 km (whichever comes first). This includes the battery performance guarantee to at least 66% of its original capacity.

For prices, please refer to the Renault Car Price list, available at your local dealer and on www.renault.ie.

How it works - SEAI grant

It is Ireland's target under the Renewable Energy Supply Directive to make sure that 10% of its transport energy comes from renewable sources by 2020. Naturally electric vehicles have a big part to play in reaching that target. Ireland has substantial resources of wind and ocean energy and electric vehicles are a great way to use this energy in order to significantly reduce its CO₂ footprint. This is why the SEAI supports EV customers with grants, reducing purchase prices and the cost of charge point installations. In addition to this, with Ireland's mild temperatures throughout the year, electric vehicles are made compatible with a wide range of driving needs. So what are you waiting for?

●= Standard (therefore no cost) ○= Optional - = Not available FOC = Free of charge option ⁽¹⁾ 80% battery charge from a rapid-charge terminal ⁽²⁾ Not available with the 17" aluminium alloys *WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 300 km in summer and 200 km in winter with the R90 and R110 motor and 280 km in summer and 180 in winter with Q90 motor, depending on the factors above. **See Driving Range page for more information.** **Non- EV tyres can influence the autonomy of the car.

The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 300 km in summer and 200 km in winter with the R90 and R110 motor and 280 km in summer and 180 km in winter with Q90 motor, depending on the factors above. (2) The official WLTP driving range is 317 km (R90) and 300 km (R110). (3) Fuel consumption and emissions measured in accordance with applicable regulations.

Renault Services

RENAULT BANK
We Bank. You Drive.

Renault Bank, choose the finance solution that best suits your needs.

At Renault Bank, we pride ourselves on being:

- **Flexible.** We have flexible payment plans. We can tailor the term, the deposit or the repayment to meet your needs.
- **Competitive.** We offer competitive rates and attractive financial packages you will not find anywhere else.
- **Simple.** We provide an easy application process, quick decision and minimum paperwork, all at your Local Dealer.
- **Creditable.** We are part of one of Europe's largest motor finance companies and offers financial services to millions of customers everyday.

Renault Bank is a trading name of RCI Banque Branch Ireland, a wholly owned subsidiary of the Renault Group. RCI Banque is regulated by the French banking authority and is supervised by the Central Bank of Ireland for conduct of business purposes.

Renault Warranty

Renault ZOE comes with a 5 year / 200,000km Renault manufacturer warranty.

The battery is guaranteed for 8 years / 160,000km (which ever comes first). This includes the battery performance guarantee to at least 66% of its original capacity.
