

# Make it your own.

Volkswagen  
accessories to  
improve your style  
and protection.

A lot goes into a Transporter, whether it's the amount of load or the level of accessories you can add to it.

With the whole host of accessories to choose from, you can personalise your Transporter Van to be just right for you and your business. Below are just a few of the specialist packs we've selected to make your Transporter your own.

### Style pack - £2,449

**18" sportline wheels, lowering springs & black side bars**

Lowered by 30mm and with sporty 18" tyres and wheels, your Transporter will look the best on site. Add the matt black sidebars and the head turning style is completed.

### Protection pack - £379

**Floor mats, seat covers & rear bumper protector**

Cover your back with a range of seat covers and a rear bumper protector to prevent scratches and loading bumps. Deep grooved heavy-duty front floor mats will prevent mud and spillages reaching the carpet and are held firmly in place with the floor attachment points.

### Kenwood driver safety camera - £209

The premium Kenwood DVR-410 driver safety camera is a compact GPS camera recording other road users in glorious high definition and features a range of safety systems, including parking, forward collision, lane departure and departure delay settings.

### NextBase front and rear dash cam kit - £289

The NextBase plug-and-play Dash-Cam features a 2.7" screen and records other road users' actions in high definition.

The Full HD Rear Dash Cam is a rear view camera that works in conjunction with your front-facing 512GW Dash Cam. It records in high quality Full HD, so you'll be able to make out every little detail of your recordings just in case there's a nearby incident you wish to revisit, or you want to note down another vehicle's details.

### Kenwood subwoofer 250w - £399

The unit fits directly under the passenger seat to greatly enhance your listening experience. The D-class amplification allows greater power and as it's made from cast aluminum, it will help give an improved bass.
