COOPER

A 1.5-l 3-cylinder petrol engine (136 hp/100 kW) offers a handy blend of power and fuel economy. It hosts a safety bar hidden behind a body colour panel and a tailgate handle.

COOPER S

To really take things up a gear, climb aboard the new MINI Convertible Cooper S. Under the bonnet it boasts a 2.0-l MINI TwinPower Turbo 4-cylinder engine that generates 178 hp/131 kW. The air intakes in the front bumper, the air scoop in the bonnet and the central twin exhaust tailpipe all hint at the power waiting to be unleashed on the road.

JOHN COOPER WORKS

With a 2.0-l 4-cylinder petrol engine (231 hp/170 kW), the John Cooper Works packs the biggest punch. The standard John Cooper Works aerodynamic kit includes front and rear bumpers with sporty John Cooper Works styling and red brake callipers which underline the John Cooper Works heritage.

The CO₂ figures shown above have been determined according to the WLTP test. WLTP has been used as the applicable CO₂ figure from 1 April 2020 for first year vehicle tax (VED) and from 6 April 2020 for company car tax (BIK).
