TOYOTA
ACCIDENT
CARE

0800 246 824

If you're involved in an accident...

...we'll be here to help you. All you'll need to do is follow the steps below, then get in touch with us before you contact your insurance company. We'll take care of you and advise on what to do next.

01 Stay safe

Dial 999 immediately if anyone is injured. Ensure everyone is safe and then, if possible, switch on your hazard lights and set up your car's warning triangles to warn other road users.

02 Exchange details

However small the incident, you must swap full details with the relevant parties. If anyone's injured, if the road is blocked or if somebody refuses to give insurance details you must report what has happened to the police.

03 Describe the accident

Always record as much relevant information you can about the accident (for example, take photos). If it helps, you can use the area on the right to do this.

04 Call us on **0800 246 824**

When you've completed all the above, simply call us and our fully trained experts will advise you on what to do next.
