

BORN IN BRITAIN

MG GT

BORN A REBEL

MG GT

BORN TO BE A REBEL

The MG GT has been carefully designed to be more spacious and serve various uses. Under the concept which combines performance, handling, design and safety together, the car radiates a sense of sportiness and facilitates all types of lifestyles with functions and technologies for those who are in pursuit of something beyond. A well-thought-out vehicle to answer your identity.

A red MG GT car is shown from a rear three-quarter view, parked on a paved surface. The car features a prominent rear spoiler, distinctive 3D LED Race Track tail lamps, and a license plate that reads 'MG GT'. The background consists of a modern building with large glass windows and palm trees, suggesting a tropical or urban setting. The lighting is warm, indicating a sunset or sunrise scene.

MG GT

IDENTITY BEYOND DESIGN

At the rear, 3D LED Race Track tail lamps are inspired by a starting gun concept. Finishing the overall look is a palette of bold, youthful paint colours that are inspired by the original MG GT's Nuclear Yellow paint, and two-tone alloy wheels with 17-inch rims and tomahawk spokes that enhance the feeling of speed.

MG GT

DESIGN BEYOND IDENTITY

The design reflects the driver's beyond image. MG's latest signature design of 3D digital burning front grille, the sharp lines, the agility and the slim body of sports coupe design provide a pleasant look. The 5-Stalk alloy wheels and LED projector headlights give an irresistible sporty feel.

ALL-POWERFUL PERFORMANCE

A sleek, sporty sedan should deliver a smooth performance, and the MG GT exceeds expectations. Available in two variants, it impresses from the moment you ignite the engine. Choose the 1.5 Turbo model for a powerful, sporty drive; producing 173HP and 275Nm maximum torque, it propels you from 0-100km/h in only 8.5 seconds*. The 1.5L engine, meanwhile, is a high-efficiency option matched to an eight-speed iCVT gearbox, which can achieve a fuel economy of 5.7l/100km*. With a carefully developed sports chassis underpinning the model, you'll experience a drive that is stable, comfortable and above all, responsive.

SNAZZY INTERIOR

The MG GT blends the high levels of comfort you'd expect from a compact Sedan yet evokes the feeling of a fighter jet. Alongside the soft padded materials and Piano Theme-inspired dashboard aesthetics are bucket seats that envelop the body, providing optimum comfort and support on even the longest journeys. The fighter jet style glossy gear knob and aviation grade aluminum accents enhances the athletic quality further, while a wide sunroof complements the spaciousness of the cabin, flooding it with natural light.

ADVANCED SAFETY

Wherever you're headed, the MG GT keeps you and your passengers protected. A high-density steel cage body with laser brazing technology works alongside the driver and all passengers. Side chest airbags provide protection against impacts, while rear parking sensors and a rearview camera offer assurance when you're reversing and manoeuvring. With ISOFIX anchor points as standard, younger passengers are kept safe, and an electric parking brake and tyre pressure monitoring system provide added peace of mind. Choose the DEL trim for cutting-edge features such as Forward Collision Warning System, Lane Departure Warning System, side curtain airbags and a 360-degree camera.

An illustration showing a yellow MG GT car in the foreground and a silver car ahead of it. Blue concentric arcs emanate from the front of the yellow car, representing the sensor's range. A red warning triangle is positioned between the two cars, indicating a potential collision.

FORWARD COLLISION WARNING

An illustration from a top-down perspective of a yellow MG GT car. Red sensor beams extend outwards from the car, and a red rectangular box highlights a bicycle in the adjacent lane, demonstrating the 360-degree camera's ability to detect surrounding objects.

360° VIEW PARKING CAMERA

An illustration from a top-down perspective of a yellow MG GT car on a road with white lane markings. Blue concentric arcs emanate from the car, representing the sensor's range. The car is shown slightly drifting out of its lane, with the sensor detecting this deviation.
